Patient Information

ORIGINAL STATEMENT

Patient name: vivek. Age: 20. Gender: Male. Query: i have fever for past 2 days along with cold and cough

TRANSLATED STATEMENT

Patient name: vivek. Age: 20. Gender: Male. Query: i have fever for past 2 days along with cold and cough

Complexity Assessment

COMPLEXITY LEVEL

LOW

ASSESSMENT REASON

Common symptoms of a viral upper respiratory infection, often manageable with rest and over-the-counter medications.

Diagnosed Condition

Common Cold / Viral Flu-like Illness

Precautions & Safety Measures

- Get plenty of rest to help your body recover.
- Stay well-hydrated by drinking fluids regularly.
- Avoid close contact with others to prevent spreading the infection.
- Wash your hands frequently with soap and water.

Dietary Recommendations

Foods to Include

- Warm soups (e.g., chicken soup, vegetable soup)
- Plenty of water, clear broths, and herbal teas
- Soft, easy-to-digest foods (e.g., khichdi, porridge)
- Fresh fruits rich in Vitamin C (e.g., oranges, guavas)

Foods to Avoid

- Spicy and oily foods
- Sugary drinks and processed foods
- Alcohol and caffeinated beverages

Recommended Medications

- Paracetamol (Acetaminophen) for fever and body aches (OTC)
- Over-the-counter cough syrup (e.g., containing Dextromethorphan for dry cough or Guaifenesin for wet cough)
- Nasal saline drops or spray for blocked nose (OTC)

Natural Remedies & Home Care

- Gargle with warm salt water 2-3 times a day for sore throat relief.
-

- Drink ginger and honey tea to soothe cough and throat.
- Perform steam inhalation for 10-15 minutes, 2-3 times a day, to clear nasal passages and ease congestion.
- Drink warm turmeric milk before bedtime for its anti-inflammatory properties.

Activity & Lifestyle

Complete rest and avoid strenuous activities. Limit outdoor exposure.

Follow-Up Guidance

Follow-up Timeline: If symptoms worsen or do not improve within 5-7 days.

Seek Immediate Medical Attention If:

1. High fever (above 102°F or 39°C) that does not respond to medication
 2. Difficulty breathing or shortness of breath
 3. Severe chest pain or persistent wheezing
 4. Persistent vomiting or inability to keep fluids down
 5. New or worsening symptoms like severe headache or stiff neck
-

General Health Advice

- Cover your mouth and nose with a tissue or your elbow when coughing or sneezing.
 - Avoid touching your eyes, nose, and mouth.
 - Ensure good ventilation in your living space.
 - Monitor your temperature regularly and keep track of your symptoms.
-
