Patient Information

ORIGINAL STATEMENT

Patient name: vivek. Age: 20. Gender: Male. Query: i have fever for past 2 days along with cold and cough

TRANSLATED STATEMENT

Patient name: vivek. Age: 20. Gender: Male. Query: i have fever for past 2 days along with cold and cough

Complexity Assessment

COMPLEXITY LEVEL

LOW

ASSESSMENT REASON

Common symptoms of a viral upper respiratory infection (fever, cold, cough) with a short duration (2 days), typically manageable with self-care and OTC medications.

Diagnosed Condition

Common Cold / Viral Upper Respiratory Infection

Precautions & Safety Measures

- Get plenty of rest to help your body recover.
- Stay well-hydrated by drinking fluids regularly.
- Avoid close contact with others to prevent spreading the infection.
- Wash your hands frequently with soap and water.

Dietary Recommendations

Foods to Include

- Warm soups (vegetable or chicken broth)
- Plenty of water, herbal teas, and clear fluids
- Soft, easily digestible foods like rice, toast, and boiled vegetables
- Fresh fruits rich in Vitamin C (e.g., oranges, berries)

Foods to Avoid

- Spicy and oily foods
- Very cold beverages
- Alcohol and caffeinated drinks
- Processed foods

Recommended Medications

- Paracetamol (Acetaminophen) for fever and body aches (e.g., Dolo 650, Crocin Advance)
- Over-the-counter cough syrup for symptomatic relief (e.g., containing Dextromethorphan for dry cough or Guaifenesin for productive cough)

Natural Remedies & Home Care

- Gargle with warm salt water (1/2 tsp salt in a glass of warm water) for sore throat relief.
-

- Perform steam inhalation 2-3 times a day to relieve nasal congestion and cough.
- Drink ginger and honey tea (mix fresh ginger juice with honey in warm water).
- Consume turmeric milk (haldi doodh) before bedtime for its anti-inflammatory properties.

Activity & Lifestyle

Complete rest is recommended. Avoid strenuous physical activities and exertion.

Follow-Up Guidance

Follow-up Timeline: If symptoms worsen or do not show improvement within 3-5 days.

Seek Immediate Medical Attention If:

1. High fever (above 102°F or 39°C) that doesn't respond to medication.
 2. Difficulty breathing or shortness of breath.
 3. Severe chest pain or persistent wheezing.
 4. Persistent or worsening cough, especially if producing colored phlegm.
 5. New symptoms like severe headache, stiff neck, or rash.
-

General Health Advice

- Maintain good hand hygiene by washing hands frequently.
 - Cover your mouth and nose with a tissue or your elbow when coughing or sneezing.
 - Use a humidifier in your room to ease congestion.
 - Avoid smoking and exposure to secondhand smoke.
-
